Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on April 21 2005 is acknowledged.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Aime (6467138).

Aime discloses a matching layer 20 containing a plurality of conductive elements 22 therein that extend from the top to the bottom of the layer. The elements can be cylindrical. The elements are connected to conductive layers 18,22. At least some of the connection are located toward the edge of the layer. Refer to figures 4, 5a-d, 6a-d,g,f and column 3, lines 28-31, column 4, lines 1-31, column 5, lines 49-64 and column 6, lines 13-39.

3. Claims 1-10, 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Corbett et al (6266857).

Art Unit: 1772

Colbertt et al teaches a matching layer that has holes there through and is then plated with a metal conductor that covers the top and bottom of the layer and also coats the interior of the hole (i.e. a conductor that extends at least partially into the layer). The holes 32 are located more towards the edge of the layer. Refer to figures 4A-4D, 5A-5C in Corbett et al that shows backing layer 24 and metal conductive layer 34 extending through holes 32 along with column 4, line 18 through column 5, line 25.

Allowable Subject Matter

4. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach, or provide motivation for, the specific alignment of the particles as recited in claim 13.
